

## Amendment to Claims

This listing of Claims will replace all prior versions and listings of claims in this Application.

### Listing of Claims

Claim 1. (CURRENTLY AMENDED) A user interface for providing an alternate means of printing a document on a computer to a printer ~~controlling a peripheral devices~~ comprising:

a ~~peripheral printer~~ option display generated by the ~~peripheral printer's~~ device-specific options driver software for presenting ~~peripheral printer~~-specific peripheral options to a user immediately following selection of the ~~peripheral-device printer~~ from a command bar icon in an independent vendor's PC application, wherein the independent vendor's PC application initiates the printing sequence activating the printer's device-specific options driver software, and wherein said ~~peripheral printer~~ option display includes a ~~peripheral printer~~-specific user interface.

Claim 2. (CURRENTLY AMENDED) The interface of claim 1 which includes a bypass function for de-selecting said ~~peripheral printer~~ option display.

Claim 3. (CURRENTLY AMENDED) A user interface for providing an alternate means of printing a document on a computer to a printer ~~controlling a peripheral devices~~ comprising:

a ~~peripheral printer~~ options display generated by the ~~peripheral-device printer's~~ device-specific driver software which automatically displays ~~peripheral printer~~ options in a ~~peripheral printer~~ option display including a ~~peripheral-device printer~~-specific user interface to a user immediately following selection of a ~~peripheral printer~~ icon from a command bar in an independent vendor's PC application which includes access to a printer as a secondary function,

wherein said ~~peripheral printer~~ options display includes a ~~peripheral device printer-specific~~ user interface, wherein the independent vendor's PC application initiates the printing sequence activating the printer's device-specific options driver software.

Claim 4. (CURRENTLY AMENDED) The interface of claim 3 which includes a bypass function for de-selecting said ~~peripheral printer~~ option display.

Claim 5. (CURRENTLY AMENDED) A ~~peripheral print~~ device-specific user interface for providing an alternate means of printing a document on a computer to a printer controlling a ~~peripheral devices~~ comprising:

a ~~peripheral device printer-specific~~ driver which presents, upon selection of a ~~peripheral printer~~ icon, a ~~peripheral print~~ option device-specific display including a ~~peripheral device printer-specific~~ user interface, wherein the independent vendor's PC application initiates the printing sequence activating the printer's device-specific options driver software; and

a bypass function for de-selecting said ~~peripheral device printer-specific~~ display.
